

Framework Solutions | Capability Statement

January 24, 2026

Company Overview

Framework Solutions is a public-sector healthcare and enterprise technology consulting firm specializing in data warehousing, data platforms, system integrations, custom application development, and managed services for regulated environments. We support public-sector healthcare organizations, including medical, dental, and behavioral health delivery in correctional settings, as well as private-sector enterprises requiring scalable, secure, and reliable systems.

Core Capabilities

Data Warehousing & Analytics

- Enterprise Data Warehouse and Data Mart design
- Dimensional modeling using star and snowflake schemas
- ETL and ELT pipelines for batch and incremental processing
- Audit-friendly and reconciled reporting datasets
- Performance tuning for large-scale analytical workloads
- Healthcare analytics across medical, dental and substance use disorder (SUD) domains

Data & Cloud Platforms

- Azure SQL Managed Instance and Azure SQL Database
- Azure Synapse Dedicated SQL Pools
- On-premise SQL Server architecture and administration
- Hybrid cloud and on-premise data platforms
- Azure Data Factory and hybrid data pipelines
- High availability, disaster recovery, and performance tuning

Application & .NET Solutions

- Custom .NET application development
- API and service-based architectures
- Backend services for integrations and workflows
- Secure application design for regulated environments
- Modernization and enhancement of existing .NET systems

Healthcare Data Enablement & Interoperability

- Cerner Millennium demographic and HL7 data enablement
- Integration with offender management data sources supporting healthcare delivery
- HL7 message generation, transformation, and transport
- Business event-driven integrations
- Real-time and batch system synchronization

Managed Services

- SQL Server and Azure SQL monitoring
- Performance tuning and capacity planning
- Patch and upgrade planning
- Incident response and production support
- Ongoing advisory services

Relevant Experience

Representative Clients

- California Correctional Health Care Services (CCHCS)
- Placer County
- Xerox
- Affiliated Computer Services (ACS)

Differentiators

- Deep experience in regulated healthcare environments
- Proven success supporting healthcare delivery in correctional settings
- Strong expertise across cloud, on-premise, and hybrid architectures
- Ability to integrate healthcare systems with supporting enterprise data sources
- Practical, operations-focused solutions designed to survive audits

Contracting Information

California TDDC Vendor

Master Service Agreement (MSA): 5167010

Available for task orders, staff augmentation, and project-based engagements.
